22nd June 2020

Dear Colleague

Re: Adult ADHD Service

Following on from previous correspondence we are pleased to inform you that Adult ADHD services will be transferring to Psychiatry-UK (PUK) from Lancashire and South Cumbria Foundation Trust (LSCFT) on **1 July 2020**.

We would like to now provide you with further information about the new service and how to make referrals into PUK.

PUK will provide a fully digital service and are currently providing a service to patients in Cumbria, but this will now be extended across the Lancashire and South Cumbria footprint. (Excluding Blackpool who have a stand-alone service). Patients have been notified of these changes, their clinical records and care are in the process of being transferred to PUK.

To find out further information about PUK please follow the link below which also informs you of the CQC rating to read at your leisure.

<https://www.psychiatry-uk.com/>

Patients under current care and treatment are being prioritised and seen according to need and risk, however you can now refer new patients into PUK by using the attached referral form.

I would like to stress that the adult ADHD service provided by LSCFT is still operational and providing support until 30 June 2020.

***NB: New referrals are not being accepted by LSCFT.**

If you have any queries regarding the above, please do not hesitate to contact me.

Yours Sincerely

Denise Woodburn

Senior Planning, Transformation & Delivery Officer, Mental Health
